Nordic Implementation Conference

Joining the Forces of Implementation

Dear Conference Attendee!

Welcome to the 3rd Nordic Implementation Conference.

We are delighted to see you in Copenhagen and grateful that you will help us make this conference a worthwhile event.

The Nordic Implementation Conference provides a platform for knowledge exchange and critical debate among implementers from practice, research and policy.

Our scope is multidisciplinary, and among our 330 conference participants are professionals from all human service sectors, including health, social welfare, and education. They provide a unique opportunity to connect with like-minded colleagues and to understand how implementation is conceptualized, researched and practiced in multiple sectors, by various professions and in different countries.

We hope that the conference will contribute to our shared efforts to continuously gather implementation professionals around a shared mission to enhance our knowledge about high-quality implementation for the benefit of children, youth, adults, families and communities.

On behalf of the planning committee

Bianca Albers

Chair, European Implementation Collaborative (EIC)

29 May, 2018

Programme - Day 1

| Time | | Room |
